

THE WEB OF LIFE

God created all people.
We are connected by God's love for us.

Trace over the lines in this web. Write names of people you know such as a school friend, family members, a soccer coach. See how everyone is connected in the web of life that God has created.

Parents and Catechists: Encourage children to think of people in all aspects of their lives when putting names on the web. Also think of people the children do not know (a ten-year-old in Israel, a grandmother in France, a baby in New Zealand) and encourage children to find what they have in common with these people. Note that because the Catholic Church is catholic, that is universal, it welcomes all people. We learn from this and become welcoming also.
